

Technical Data Sheet Healthwize

Description

Healthwize is formulated to remain in a liquid state under 76°F, allowing it to be pumped and poured at room temperature. Healthwize is made with a blend of Canola Oil and Coconut Oil, delivering the extra aroma, flavor and color provided from coconut oil. Healthwize contains 65% lower saturated fat and offers a higher melting point than products made with 100% coconut oil.

Common Uses:

Popping Oil.

Claims:

Kosher Pareve SQF Food Safety and Food Quality

Handling and Storage:

Store at 65°F - 75°F in a dry and odor free environment.

Shelf Life:

12 Months from the date of manufacture

Product Specifications

Flavor	Buttery & Clean
Appearance	Light Golden Red
Iodine Value	75 - 91 meq/kg
Free Fatty Acid	.05 Max (%)
Peroxide Value	1.0 Max (meq/kg)
OSI @ 110°C	7.5 Minutes (hrs)
Color, Lovibond Red	40 Red
Cold Test @ 32°F	12 Hrs Min
Moisture	0.05% Max
Smoke Point	435°F
Flash Point	602°F
Cold Test @ 32°F Moisture Smoke Point	12 Hrs Min 0.05% Max 435°F

Technical Data Sheet Healthwize

Allergen/Sensitivity:

Healthwize does not contain any of the nine major allergens, which are soy, eggs, peanut, milk, wheat, tree nuts, fish, shellfish and sesame.

Refined, bleached, and deodorized (RBD) oils do not contain any proteinaceous material. The high temperature and filtration used in the RBD process effectively removes any proteins, potentially allergenic material from the oil. Refined oils do not require allergen labeling under the Food Allergen Labeling and Consumer Protection Act of 2004 (FALCPA).

Allergen	In the Product	On the same Line	In the Facility
Soy	No	No	Yes
Wheat	No	No	Yes
Gluten	No	No	Yes
Milk	No	No	Yes
Fish	No	No	Yes
Egg	No	No	Yes

GMO Statement GMO Free

This term shall be used to describe products that contain ingredients, additives or processing aides derived from commodities that have commercially grown GMO varieties in the supply chain, BUT residual DNA/protein is likely NOT detectable in the final product.

Healthwize is refined, bleached and deodorized (RBD) and does not contain any proteinaceous material. During the RBD process, oil is exposed to high temperatures, vacuum stripping and is filtered through diatomaceous earth; effectively removing all extraneous material that might harbor genetically modified organisms (GMO's) or substances (protein, DNA) derived thereof.

As per the USDA, this product is not considered to be Bioengineered and no additional labeling is necessary.
