## ORGANIC SOYBEAN

**TRADE NAME:** Organic soybean

**DESCRIPTION:** Soybean (Glycine max) is one of the main ingredients present when formulating poultry diets as well as one of the main sources of high quality vegetable protein in the animal feed industry worldwide. its meal is widely used for animal feeding due to its high protein and essential amino acids content. The diets of the main farmed animals contain soybean.

**CHARACTERISTICS:** It is an herbaceous plant of the legume family, which reaches half a meter in height. it has been defined as a legume-oilseed. it's a legume because it botanically has the same characteristics of the grains included in that category and it's oleaginous due to its oil content, which is mostly stored in its structures, it has relatively high protein content and suitable amino acid profile as well as minimal variation in nutrient content.

### PRODUCT & SPECIFICATIONS:

SPECIFICATIONS	
<b>Quality</b>	Standard export quality
<b>USDA Grade</b>	Grade #2
<b>Test Weight</b>	54lb per bushel min.
<b>Protein</b>	34% min.
<b>Moisture Content</b>	13.5% max.
<b>Foreign Material</b>	2.0% max.
<b>Oil Content</b>	18.5% min.
<b>Splits</b>	20% max.
<b>Total Damage</b>	4%
<b>Kernels</b>	3.0% max.
<b>Free Fatty Acids</b>	1.0% max.
<b>Discolored Seeds</b>	2.0% max.

### PRESENTATION AND STORAGE CONDITIONS:

-1 mt. polypropylene bags.  
-50 kg. polypropylene bags.  
Keep in dry, clean and free of pests environmental conditions with 20° to 25°C temperature and relative humidity of 65%.
