# CBD-Inspired

## FRAGRANCES

Tap into the cannabidiol (CBD) trend through fragrance with artisanal scents that capture the spirit of CBD. Please note that these fragrances do not include cannabis-derived ingredients.

### Natural Cannabis-Inspired

This all-natural essential oil blend evokes the earthy sensuality of cannabis. Notes of pink and black peppercorn lend a spicy sparkle to calming lavender and dry to a woody base of patchouli, cedar, and smoke.

### Cannabis-Inspired Terpenes

This herbaceous blend highlights the terpenes found in cannabis but sourced from other botanicals. Transparent citrus top notes infuse with lavender, sappy pine, warming pepper, and amber for that foggy forest feel.

### Kush Type

A modern twist on cannabis that is far from Woodstock cliches. Fresh and green genderless notes of suede, tulip, and cannabis flower dry down to a grounding base of white musk and amber.

### Smoky Vanilla

This sultry cannabis blend takes place where edible and incense intersect. Smoky vanilla bean, sandalwood, and carissa burn to an acrid base of cannabis resin and caramelized sugar.

### Damask Rose & Oud

Deep rose petals with a touch of spice are balanced by a rich base of oud wood, warm amber, and white musk.

### Lavender Vanilla

Juicy lemon and lush green notes open into a soothing blend of lavender, precious spices, and warm vanilla bean.
