

TECHNICAL DATA SHEET

P-1491

ISSUE DATE: 10/11/2019

PRODUCT DESCRIPTION	P-1491 is a high viscosity general purpose polyvinyl acetate homopolymer emulsion stabilized with polyvinyl alcohol. It possesses a high molecular weight, highly branched structure with a broad particle size distribution.	
USES	It is extremely tolerant of plasticizer and solvent additions and is recommended as a general purpose adhesive base.	
FEATURES	<ul style="list-style-type: none">• Fast setting• Extraordinary high wood shear strength• High molecular weight• Broad particle size distribution	
TECHNICAL PROPERTIES	Viscosity (cps) :	3,200 - 4,000 @ 75°F
	Solids (%):	55.0 - 57.0
	Density (lbs/gal):	9.0 ± 0.2
	pH:	4.5 - 6.0
PRODUCT APPLICATION		
ADDITIONAL DATA	Color: White	Borax Compatibility: Not compatible
	Protective Colloid: Partially acetylated polyvinyl alcohol	
	Particle Size: 1 - 4 microns	
PACK SIZES	45 lbs pail	475 lbs drum
	2,400 lbs tote	weights may vary
STORAGE CONDITIONS	Protect from freezing.	
LIMITATIONS	Shelf life: Six (6) months.	

Any recommendations contained herein or any information given by any ONA Polymers representative is based on tests and information believed to be accurate. However, since we have no control over the conditions under which our products are transported, stored, handled, or used by purchasers, all recommendations and sales are made on condition that ONA Polymers will not be held liable for any damages resulting from their use. No representative of ours has any authority to waive or change this provision. It is the user's responsibility to ensure that this sheet is current prior to using the product.
