

SAFETY DATA SHEET

This safety data sheet was created pursuant to the requirements of: US - OSHA Hazard Communication Standard (29 CFR 1910.1200)

Issuing Date 03-January-2017	Revision Date 29-January-2025	Version 10.8		
1. Identification				
Trade Name	Polypropylene Homopolymer			
Product Code	5E16S, CP1000A, CP1200B, CP250H, CP350WV, CP360H, D022I D080T, D115A, D130C, D180A2, D180M, D218.00, F006EC2, F003 F180A, F350HC2, FF026M, FF030F2, FP650WV, FPT300F, FPT36 FT120WB2, FT120WV, FT140WV, FT200WV, GH4, GH12, GH12V H 107, H521, H734-52RNA, HEM350B, INSPIRE™ 6021N, INSPIR 6023PN, INSPIRE™ 6025, INSPIRE™ 6025N, LGF7600, LGF7900 PG170H, PG80Q, PG480, PM25, PM25HN, TJP120, TJP130, ZS-7	8F, F013M, F1000HC, 50WV3, FT120W2, 7, GH20, GH20V, GH35, 2E™ 6023N, INSPIRE™ 0, PF260GQ, PG13H,		
Other means of identification				
Recommended use of the chemica	al and restrictions on use			
Recommended use	Polymer preparations and compounds			
Restrictions on use	No information available			
Details of the supplier of the safety	y data sheet			
Supplier Address Braskem America, Inc. 1735 Market Street Philadelphia, PA 19103-7583 TEL: (800) 396 - 5251				
Emergency telephone number				
Emergency Telephone	CHEMTREC: +1-703-527-3887 (INTERNATIONAL) 1-800-424-9300 (NORTH AMERICA)			
2. Hazard(s) identification				

Classification

This chemical is considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200)

Combustible dust

Yes

Hazards not otherwise classified (HNOC)

Not applicable

Label elements

Warning

Hazard statements

May form combustible dust concentrations in air

Other information Special danger of slipping by leaking/spilling product. Electrostatic charges may be generated during handling. If small particles are generated during processing or handling, this product may form combustible dust concentrations in air.

3. Composition/information on ingredients

Substance

Not applicable.

Mixture

Chemical name	CAS No	Weight-%	Trade secret
Polypropylene	9003-07-0	98 - 100	*

*The exact percentage (concentration) of composition has been withheld as a trade secret.

4. First-aid measures

Description of first aid measures

Inhalation	Move victim to fresh air. Medical aid is necessary if symptoms appear to be an obvious consequence of inhalation.
Eye contact	Rinse thoroughly with plenty of water, also under the eyelids. Get medical attention if irritation develops and persists.
Skin contact	After contact with product or dust: Wash skin with soap and water. Get medical attention if irritation develops and persists. After contact with molten product, cool skin area rapidly with cold water. Removal of solidified molten material from skin requires medical assistance.
Ingestion	Do NOT induce vomiting. Clean mouth with water and drink afterwards plenty of water. Never give anything by mouth to an unconscious person. Consult a physician if necessary.
Most important symptoms and effe	cts, both acute and delayed
Symptoms	Product dust may be irritating to eyes, skin and respiratory system.
Indication of any immediate medica	al attention and special treatment needed
Note to physicians	Treat symptomatically.

5. Fire-fighting measures

Suitable Extinguishing Media	CO2, dry chemical, dry sand, alcohol-resistant foam. Water spray or fog.
Unsuitable extinguishing media	Do not use a solid water stream as it may scatter and spread fire.
Specific hazards arising from the chemical	Avoid generation of dust. Fine dust dispersed in air may ignite. Powders, dusts, shavings, borings, turnings or cuttings may explode or burn with explosive violence.
Explosion data Sensitivity to mechanical impac	ct None.
Sensitivity to static discharge	Yes.
Special protective equipment for fire-fighters	Firefighters should wear self-contained breathing apparatus and full firefighting turnout gear. Use personal protection equipment.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Personal precautions	Ensure adequate ventilation. Avoid generation of dust. Avoid contact with eyes. Use personal protective equipment as required. Do not breathe dust. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Take precautionary measures against static discharges.
Other information	Refer to protective measures listed in Sections 7 and 8.
Methods and material for containm	ent and cleaning up
Methods for containment	Prevent further leakage or spillage if safe to do so. Prevent dust cloud.
Methods for cleaning up	Take up with inert, damp, non-combustible material using clean non-sparking tools and place into loosely covered plastic containers for later disposal. Pick up and transfer to properly labeled containers.

7. Handling and storage

Precautions for safe handling

Advice on safe handling Handle in accordance with good industrial hygiene and safety practice. Ensure adequate ventilation. Avoid generation of dust. Do not breathe dust. Avoid contact with eyes. This product is a poor conductor of electricity and can become electrostatically charged. If sufficient charge is accumulated, ignition of flammable mixtures can occur. To reduce potential for static discharge, use proper bonding and grounding procedures. Airborne dusts are potentially explosive. Avoid significant deposits of material, especially on horizontal surfaces, which may become airborne and form combustible dust clouds and may contribute to secondary explosions. Handling and processing operations should be conducted in accordance with 'best practices' (e.g. NFPA-654).

Conditions for safe storage, including any incompatibilities

Storage Conditions	Store in a cool, dry area away from potential sources of heat, open flames, sunlight or other chemicals. Keep container closed when not in use. Keep in an area equipped with sprinklers.
	אוווועבוא.

8. Exposure controls/personal protection

.

Control parameters

Exposure Limits

Chemical name	ACGIH TLV	OSHA PEL	NIOSH IDLH	
Polypropylene	Not applicable	Not applicable	Not applicable	
Appropriate engineering contro	bls			
Engineering controls	Ensure adequate ventilati systems (such as exhaus designed in a manner to p leakage from the equipme local exhaust ventilation a	Ensure that eyewash stations and safety showers are close to the workstation location. Ensure adequate ventilation, especially in confined areas. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment). It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen- deficient environment.		
Individual protection measures	, such as personal protective	<u>equipment</u>		
Eye/face protection		side shields (or goggles). During a risk of contact:. Face protection		
Hand protection	Wear suitable gloves. Hea materials.	at resistant gloves are recommend	ded when handling molten	
Skin and body protection	Wear suitable protective of shoes or boots.	clothing. During hot processing:. L	ong sleeved clothing, Protective	
Respiratory protection	No protective equipment is needed under normal use conditions. If exposure limits are exceeded or irritation is experienced, ventilation and evacuation may be required. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. The filter class must be suitable for the maximum contaminant concentration (gas/vapor/aerosol/particulates) that may arise when handling the product. Consult with an industrial hygienist to determine the appropriate respiratory protection for your specific use of this material. A respiratory protection program compliant with all applicable regulations must be followed whenever workplace conditions require the use of a respirator.			
General hygiene consideration	Do not eat, drink or smoke	h good industrial hygiene and safe e when using this product. Take o lar cleaning of equipment, work ar	ff contaminated clothing and	

9. Physical and chemical properties

Information on basic physical and chemical properties

Appearance	pellets
Physical state	Solid
Color	White to off-white
Odor	Odorless or slight odor

Odor threshold	No data available	
Property	Values	Remarks • Method
Hq	No data available	None known
Melting point / freezing point	160 - 170 °C / 320 - 338 °F	None known
Boiling point / boiling range	No data available	None known
Flash point	No data available	None known
Evaporation rate	No data available	None known
Flammability (solid, gas)	No data available	None known
Flammability Limit in Air		None known
Upper flammability or explosive	No data available	
limits		
Lower flammability or explosive	No data available	
limits		
Vapor pressure	negligible	None known
Vapor density	No data available	None known
Relative density	0.9-0.92	None known
Water solubility	negligible	None known
Solubility(ies)	No data available	None known
Partition coefficient	No data available	None known
Autoignition temperature	No data available	None known
Decomposition temperature	No data available	None known
Kinematic viscosity	No data available No data available	None known None known
Dynamic viscosity	NO GATA AVAIIADIE	None known
Other information		
Explosive properties	No information available.	
Oxidizing properties	No information available.	
Softening point	No information available	
Molecular weight	No information available	
VOC Content (%)	No information available	
Liquid Density	No information available	
Bulk density	No information available	
-		

10. Stability and reactivity

Reactivity	None under normal use conditions.
Chemical stability	Stable under normal conditions.
Possibility of hazardous reactions	None under normal processing.
Conditions to avoid	Excessive heat. Heating in air. Dust formation.
Incompatible materials	No additional information available.
Hazardous decomposition products	s Decomposition products depend on temperature, exposure to air, and the presence of other substances. Processing may release irritating fumes, olefinic and paraffinic compounds, carbon monoxide, and carbon dioxide. Potential thermal decomposition products include trace aldehydes (including formaldehyde), alcohols, organic acids, and hydrocarbons.

11. Toxicological information

Information on likely routes of exposure

Product Information

Inhalation

May cause irritation of respiratory tract.

Eye contact	Dust contact with the eyes can lead to mechanical irritation.				
Skin contact	Contact with dust car	Contact with dust can cause mechanical irritation or drying of the skin.			
Ingestion	May cause irritation of the mouth, throat and stomach.				
Symptoms related to the physical, chemical and toxicological characteristics					
Symptoms	No information available.				
Acute toxicity

12. Ecological informatio	n
Fastavialty	The environmental import of this meduat has not been fully investigated

Ecotoxicity	The environmental impact of this product has not been fully investigated.
Persistence and degradability	No information available.
Bioaccumulation	There is no data for this product.

Other adverse effects

No information available.

13. Disposal considerations		
Waste treatment methods		
Waste from residues/unused products	Dispose of in accordance with local regulations. Dispose of waste in accordance with environmental legislation. Do not release into the environment. Recover or recycle if possible.	
Additional Information	Do not reuse empty containers. Do not dispose of waste into sewer. Do not dispose of with household waste. Do not allow to enter drains.	

14. Transport information

DOT	Not regulated
TDG	Not regulated
<u>MEX</u>	Not regulated
IATA	Not regulated
IMDG	Not regulated

15. Regulatory information

<u>TSCA</u>

All components of this product are listed as active on the TSCA Inventory or exempt

International Inventories

Contact supplier for inventory compliance status.

US Federal Regulations

SARA 313

Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). This product contains no known chemicals which are subject to the reporting requirements of the Act and Title 40 of the Code of Federal Regulations, Part 372.

SARA 311/312 Hazard Categories

Should this product meet EPCRA 311/312 Tier reporting criteria at 40 CFR 370, refer to Section 2 of this SDS for appropriate classifications.

CWA (Clean Water Act)

This product does not contain any substances regulated as pollutants pursuant to the Clean Water Act (40 CFR 122.21 and 40 CFR 122.42).

<u>CERCLA</u>

This material, as supplied, does not contain any substances regulated as hazardous substances under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) (40 CFR 302) or the Superfund Amendments and Reauthorization Act (SARA) (40 CFR 355). There may be specific reporting requirements at the local, regional, or state level pertaining to releases of this material.

U.S. EPA Label Information

EPA Pesticide Registration Number Not applicable

WHMIS

Uncontrolled product according to WHMIS classification criteria

Disclaimer The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

End of Safety Data Sheet

US OSHA LABEL per 29 CFR § 1910.1200(f)

Polypropylene Homopolymer

Warning

BEFORE USING, READ THE SAFETY DATA SHEET. Slipping hazard. May form combustible dust concentrations in air if small particles are generated during further processing, handling, machining, or by other means.
